## WHAT IS THE SCIENCE PROGRAM?

Champlain – Lennoxville's Science Program is a two-year pre-university program with an excellent reputation for producing top calibre graduates. Divided into two profiles, Health Science and Pure & Applied Science, the program enables students to master basic scientific knowledge in Biology, Chemistry, Mathematics and Physics, and acquire foundational research skills essential for university studies. By the end of the program, students are adept at applying a rigorous scientific approach.

The Science program at Champlain-Lennoxville is designed to allow students to complement the core program by choosing from a number of science option courses to correspond to individual needs and interests. Creativity, a passion for learning and sound research methods are encouraged. Student learning is further supported by peer-run workshops, field trips and guest speakers.

Recently, the science laboratories underwent a major renovation giving students access to some of the most state-of-the-art college facilities in the province.

# DO YOU...

Find yourself fascinated with the physical world?

Enjoy the challenge of a good math or science problem?

Want to have a career in medicine, scientific research, or as an engineer?

***Then the Science Program may be for you!***

## OPPORTUNITIES FOR GRADUATES

Graduates of Champlain's Science Program continue on to university in a wide range of fields. The program is an outstanding training ground for students looking to enter university in science and research.

Students have continued studies in Dentistry, Agriculture, Architecture, Nutrition and Dietetics, Optometry, Engineering, Physical and Occupational Therapy, Earth Sciences, Forestry, Pure Sciences, etc. Graduates have also been accepted into a number of Medical Schools including McGill, Université de Sherbrooke and Université de Laval.
